AUDIO SPECIFICATIONS

- Minimum 24 Channels Board with XLR inputs
- 14 wedges/monitors
- 4 d.i. boxes
- electric sockets

VIDEO SPECIFICATIONS

- The screen has to be the **biggest & largest possible**, hopefully as large as the stage, almost in front of the stage (and not at the bottom of the stage) and we will perform in front of this screen.
- Rear projection is better. (Then a Rear Projection Screen is needed.)
- A projector with a minimum power of 4000 lumens with a bulb/lamp in good condition and not too old ;
- A long VGA cable to link the computer (MacBook Pro, placed on stage) to the projector.
- Nota Bene: Ndox Electrique can also perform without video. Notify us then.

LIGHT SPECIFICATIONS

- The lighting of the musicians will be adapted to the projection : graduated system, drop lights 3 PC 1 kw (Lee 204) + 4 PAR64-CP61 (Lee 147) on lateral stands. Nota Bene : the darkness in the venue must be total.

TIMING

- 3 hours is the best for sound & video checks, but it can be faster is everything is absolutely ready and in function. The band will need house technicians (audio & video).

MIXING DESK

NOTA BENE :

- it NEVER had feedback, even in big festivals ;
- Gianna & François are NOT using amps but personnels emulators ;
- we can talk about it & about missing technical elements (monitors, radio mic, etc...) ;
- we can even perform on a regular stage but it twill not be a ritual but just a normal show.
